Silver aramid FR reflective tape offers excellent flame retardant protection proven by NFPA 2112 / EN 469 certificates. It is also fully compliant to EN 20471/ANSI 107. Designed for extra High Visibility and for max protection of people working at the risk of flame or open fire. For FR workwear, army/police, firefighters uniform.

EN 20471

EN 469

This Reflective Material is a Aramid Fabric coated with a layer of resin with numerous glass micro-lenses impregnated with a special glue into this layer. The light reflects from these micro-lenses and comes back to a car (or other source of light) making the person wearing reflective tape more visual in the dark.

100% Meta-Aramid

XM SilverLine Reflective tapes and films will have longer life if you follow our care instructions.

Type of work environment, exposure conditions and maintenance have an impact on reflective performance.

Please test each tape according to appropriate care instructions required for the garment.

High-visibility clothing made with reflective material should be maintained in good condition and inspected regularly for damage or deterioration.
